## A Salon Designed With Colorists in Mind

MSK Design Group has created the first boutique salon for hairstylist Vasken, in the Trump Building in White Plains. The 1,8000-square-foot salon specializes in color — color classes, training, and techniques — and was specifically designed to assure the accuracy of hair color design. A clean, white sheet of paper was a primary influence for the design of the salon; dashes of red and glossy geometric shapes punctuate the interior and showcase the salon's floating ceiling, composed of white cylinders that allow for a glowing diffusion of soft, ambient light.

Vasken Salon.
